ALL AROUND

OVER SEAS AND UNDERGROUND

I've been an artist for as long as I can remember. Began painting graffiti in 1994, growing up in a rural part of Sheffield in northern England.

Enjoyed painting the many empty and abandoned buildings I found on my travels. I was always inspired by plants, and the natural world, and how quickly these quiet and empty industrial buildings were reclaimed by nature.

After graduating in fine art I moved towards street art, painting larger more prominent mural pieces in the city. From there I began travelling with my work across Europe and further afield, eventually settling in Portugal.

Today my work is a fusion of sci-fi and surrealism, combining environmental concern, plants and nature, with a love for science and technology, brought together with a signature colour pallet using both brushes and spray paint.
